

## PETITION

To the Prime Minister, Cabinet, and leaders of the opposition parties,

Despite all the policies, forms, agencies, laws, institutions etc... in place to help protect our children, they are still being sexually abused, and the abusers are getting away with it. We have raised this petition to show you that the people in this country care and are horrified at what is being done to innocent children. This is not just happening as organised abuse, it is being done in the homes of these children. We have failed as a society if we allow this to continue. We will do all that is necessary to get you to hear us, and make the changes needed, across every area of society that plays a part in protecting children. As a start, we need to see the government implement all recommendations that come out of any inquiry, otherwise you are not doing the primary role that you have been elected to do, that of protecting the citizens of this country.

**Show the UK and the world that we will no longer stand by and let children be abused in this way.**
